

# Our mouldings and architraves aren't just a superior quality.

## They're also green.

Carter Holt Harvey has established a unique environmental policy that guarantees its range of mouldings and architraves only come from sustainable, renewable pine plantations.

But we also have a product that's setting a new performance standard. It meets Australian MR standards; so it won't swell. It's also supported by the CFMEU, is pre-primed and easy to install.

So when it comes to mouldings and architraves insist on green.
